Junior Software Engineer with hands-on experience building production-level systems. Developed an AI-powered commerce platform from scratch, including a custom CMS, page builder, and real-time automation features. Experienced in backend development within a real-world medical research platform, working with APIs, authentication, and system design. Open to full-time positions starting July 2026.

TECHNICAL SKILLS

Languages: Python, C#, C++, TypeScript

Frameworks: Django, React, Next.js, .NET

Databases: PostgreSQL, SQL, Supabase

Tools & Cloud: Git, AWS (SES), Visual Studio, PyCharm

Concepts: REST APIs, System Design, Authentication, Role-Based Access Control, AI Integration, OOP

PROJECTS

AI-Powered E-Commerce Platform

Personal Project

Technologies: TypeScript, Next.js, React, Supabase, AI Integration

- Built a full-stack commerce platform from scratch with a custom CMS and admin panel
- Developed an AI assistant capable of analyzing content and executing actions with confidence scoring
- Implemented a drag-and-drop page builder with real-time preview and undo/redo functionality
- Designed a stock reservation system to prevent overselling during checkout flows
- Created a theme editor with real-time WCAG validation for accessibility compliance
- Built a draft/publish workflow system for controlled content management
- Designed scalable architecture with validation, audit logs, and pluggable payment providers

Backend Developer – ShebaHub

Research Platform

Technologies: Python, Django, PostgreSQL, AWS SES

- Developed RESTful APIs for a research platform used by students and medical staff
- Implemented authentication and role-based access control (students / mentors / admins)
- Integrated email notification services using AWS SES for system alerts
- Collaborated with frontend and product teams in a multi-developer environment
- Contributed to debugging, deployment workflows, and improving system stability

WORK EXPERIENCE

Computer Technician & E-Commerce Administrator – GameStorm

2022–2024

- Built and customized PCs based on customer requirements, handling full hardware lifecycle
- Installed and maintained Windows systems, drivers, and software environments
- Managed online store operations including product listings and order fulfillment
- Provided customer-facing technical support, strengthening troubleshooting and communication skills

EDUCATION

B.Sc. in Computer Science – HIT (Holon Institute of Technology)

Expected July 2026

GPA: 86

MILITARY SERVICE

Combat Soldier – Israel Defense Forces (IDF)

2019–2021

- Developed discipline, teamwork, and consistent performance under high-pressure conditions
